"Clinkers" began operations. First Inning.—Vigorous kicking began to order Donovan to remain

to short right. Murphy's hit to Lyons forced Rusie at second. No runs.

Sixth Inning—Beckley filed to Tiernan. Stenzel was hit by a pitched ball and waiked to first. He reached third on Lyons's single to right, and scored on Glasscock's single, which jumped up over Doyle's head. Lyons reached third and Glasscock got to second. On Bierbauer's rapper for a base to right Lyons and Glasscock scored. Sugden foul-filed to Davis. Ehret out, Ward to Rusie. Three runs.

Burke filed to Stenzel. Davis made a clean circuit of the bases on his long drive nearly to the left field ropes. It was good only for two bases, had Sugden and Smith fielded decently. Doyle got to first on his hard grounder to Glasscock, which the latter fumbled. Ward filed to Bierbauer. Doyle stole second neatly. Van Haltren filed to Murphy. Donovan singled past second. Beckley, base on balls, Stenzel filed to Ward. Lyons, base on balls, and filling the bases. It looked ticklish for New York now if a hit should be made. It wasn't made, though. Glasscock hit a bounder to Doyle, who threw Glasscock out to Rusie, covering the base. No runs.

Tiernan out, Bierbauer to Beckley. Farrell out, Lyons to Beckley. Rusie struck out, the first man to do the trick this afternoon. No runs.

Eighth Inning-Bierbauer out, Ward to Doyle. Sugden struck out. Ehret hit to Ward, who fumbled and threw wildly past Doyle, enabling Red to reach second. It began to rain a bit and the crowd loaded themselves into the field. Smith filed to Murphy. No runs.

Murphy to base on balls, and as the ball passed clear by Sugden. Tot made second on it. Murphy turned his ankle or sprained his right leg on the run, and Fuller was called in to take his place. Time called on account of rain.

It was a handsome assemblage, too, for the gentler sex was plentifully represented, and the ladies were garbed in their most modish gowns. The enthusiasm prior to the game was characteristically collegiate, and it is always in evidence in contests where undergrads compete, be they football, baseball, rowing or on the cinder path.

A loveller day for baseball couldn't have been desired. The assemblage watched with keen interest the practice work of the collegians, and when the game began at 12.45 all hands were "on edge" for an afternoon of rare sport. GLASGOW, Scotland, June 16.—
The American sloop-yacht Vigilant was signalled this morning, making for Alisa Craig, a small island at the entrance of Firth of Clyde. She is ex pected to arrive at Greenock, about twenty miles from this city, during

the afternoon . 4 P. M.-Vigilant has arrived at Gourock, three miles from Greenock. Vigilant let go her anchor in Gourock Bay at 3.45 P. M.

Capt. Leander Jeffrey, commander of Capt. Leander Jeffrey, commander of the American yacht, reported that he had a fine passage and good weather throughout. The average distance covered per day was 294 1-2 miles. The greatest distance sailed upon any one Erie Tugboats Destroyed by the day was 256 miles, which was on the eighth day out. A large iceberg was passed in lat. 42.07 N., and long. 40.02 W. The run from America to Tory Island

was made in fourteen days and eight hours, the captain added. A representative of the Associated Press boarded Vigilant and was most

cordially received. After showing the Associated Presrepresentative the log of the days' runs, which was 88, 222, 123, 117, 247, 212, 243, 230, Jeffrey said that the iceberg which he passed was two hundred feet high and two miles long.

The Vigilant sailed quite close to

and all on board considered it to be the finest spectacle they ever witnessed. Cart. Jeffrey thinks that this iceberg was the one which the Anchor line steamship Ethiopia collided with. Vigilant formed a beautiful picture, as with Old Glory fling majectically from her ligger, she salled up the fire-tug the Clyde. Her sails were all set, and the American yacht bowied along.

On June 8 Vigilant had her topmast carried away.

### AMATEUR ATHLETIC CONGRESS GLEVELAND

Important Questions.

(Copyrighted by the Associated Press.) PARIS, June 16.—The International ongress of Amateur Athletic Associatious opened this afternoon. Baron A. de Courcel is President, and among the Vice-Presidents is ti. Adee, President of the Union Athletic Club, of New York. One of the objects of the Convention is to draw up definite rules in regard to the

The questions to be specifically dis-

Sports.

The questions to be specifically discussed are:

Definition of an amateur; basis of such definition. The possibility and utility of an international definition. Suspension, disqualification and rehabilitation. Is it right to maintain a distinction between different sports, from the amateur's point of view? Can a man be a professional in one sport and an amateur in another? The value of works of art offered as priess; should it be limited? Gate money; should it be divided between the associations interest or between the competitors? Should the general definition of an amateur be applicable to all sports? Betting, as affecting the status of amateurs. Possibility of re-establishing the Olympic games; under what conditions would thin be feasible?

The recommendations will be submitted to a later Congress, whose decisions shall be binding. The originator of the effort to decide where an amateur ends and a professional begins, is Haron Pierre de Coubertin, who has decided ideas on the National importance of the manly traits of character so long associated with ancient sports. Conferences have already been held on the subject. One was at the University Club. New York, last November, to which the principal colleges sent delegates. Another was held in London.

In the event of nothing definite being settled with reference to the Olympic games before the Paris Exhibition of 1900, the first of the series will be organized here on that occasion after the usual invitations have gone their course. As to the choice of the country for the holding of these games, it was originally intended to fix upon a spot on some frontier and ask the Government to neutralize it. At pressnt, however, it is hoped that they may take place in each country in succession.
